

Desktop-Tabs

- 1**

The Family Blackboard can be dragged out to be viewed or can be 'hidden' by the user. When a new item has been posted onto the blackboard for other users to look at, the appearance of the blackboard changes to alert the user of the new content. The blackboard can also be turned off altogether in the Preferences.
- 2**

Since the workspace is central to the functionality of Mannix, the ability to create one is always available to the user.
- 3**

The most recently accessed workspace is distinguished graphically from the others. Also, when inside of a workspace, the remaining workspaces are grayed out and shrink slightly into the background. They remain accessible but take up less room on the desktop.
- 4**

The main applications are represented by icons on the screen so that the user can drag items onto the icons in order to to easily open the applications with the dragged item already open within. The main applications are identified such that the user would often want to use them in conjunction with each other but on their own as well.
- 5**

The Browser and Channels are equally as important as the main applications but different in terms of functionality and information flow in that they bring in content whereas with the applications, the user is 'creating' the content.

1

With the workspace folder open, Todd accesses the cooking channel. The channel opens a window on the desktop so it can be viewed in conjunction with the workspace. Todd finds the recipe he is looking for.

2

The recipe on the content channel is marked with a Mannix icon **M** (this icon will be used across all content channels to identify "enhanced" content that offers functionality particular to Mannix users).

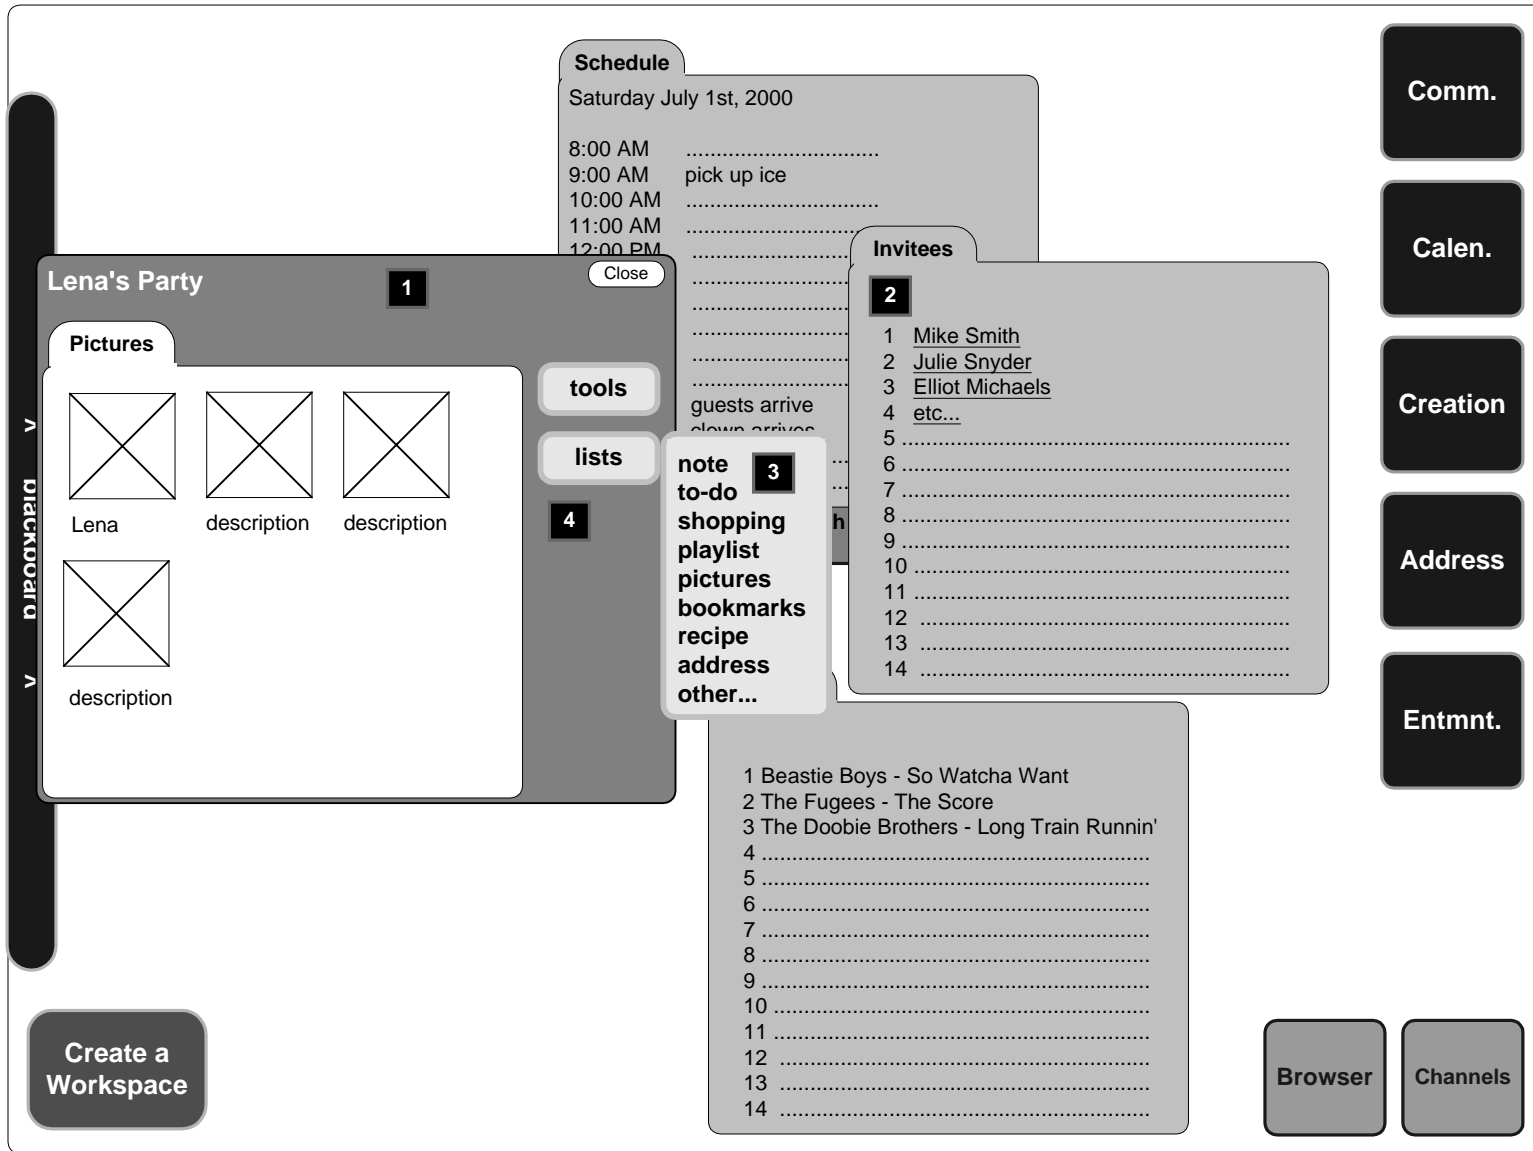

3

Once Todd drags the icon onto his workspace, Mannix prompts him with a choice to create a recipe list, a shopping list or a shopping list linked directly to an online grocer. Todd makes his choice and hits 'ok'.

4

The list(s) he chose now appear as tabs in his workspace already populated with the content from the channel.

Workspace-Tabs

The screenshot shows a workspace interface with several overlapping tabs and a vertical toolbar on the left. The tabs include:

- Schedule:** A calendar view for Saturday July 1st, 2000, with time slots from 8:00 AM to 12:00 PM. Activities include "pick up ice" at 9:00 AM and "guests arrive" at 11:00 AM.
- Lena's Party (Tab 1):** Contains a "Pictures" section with four placeholder images (squares with an 'X'). The first is labeled "Lena", and the others are labeled "description".
- Invitees (Tab 2):** A list of names: 1 Mike Smith, 2 Julie Snyder, 3 Elliot Michaels, 4 etc..., followed by numbered lines 5 through 14.
- note to-do shopping playlist pictures bookmarks recipe address other... (Tab 3):** A list of categories for notes.
- tools (Tab 4):** A button labeled "tools".
- lists (Tab 4):** A button labeled "lists".
- Browser:** A list of music tracks: 1 Beastie Boys - So Watcha Want, 2 The Fugees - The Score, 3 The Doobie Brothers - Long Train Runnin', followed by numbered lines 4 through 14.

On the right side, there is a vertical stack of buttons: **Comm.**, **Calen.**, **Creation**, **Address**, and **Entmnt.**. At the bottom right, there are two buttons: **Browser** and **Channels**. A "Create a Workspace" button is located at the bottom left. A vertical toolbar on the left contains icons for "V", "D", "I", "C", "K", "U", "O", "A", "I", "U", "V".

1

A workspace is organized with a tab system. Tabs can be added to the workspace and the type of tab determines the actions which are associated with it. The qualities associated with the tabs are transparent to the user and remain with each list whether it is in the workspace or on the desktop. With a variety of tabs, Todd can include all types of data associated with his workspace. The tab that is currently being accessed appears larger/closer to user. Additional tabs can be seen but are withdrawn slightly in the background.

2

Tabs can also be dragged onto the desktop to be viewed simultaneously.

3

Tabs are created by the user by using the "Lists" button in the workspace. The various information can be categorized as different kinds of lists. This makes it easy to archive the information and search for it with varying criteria.

4

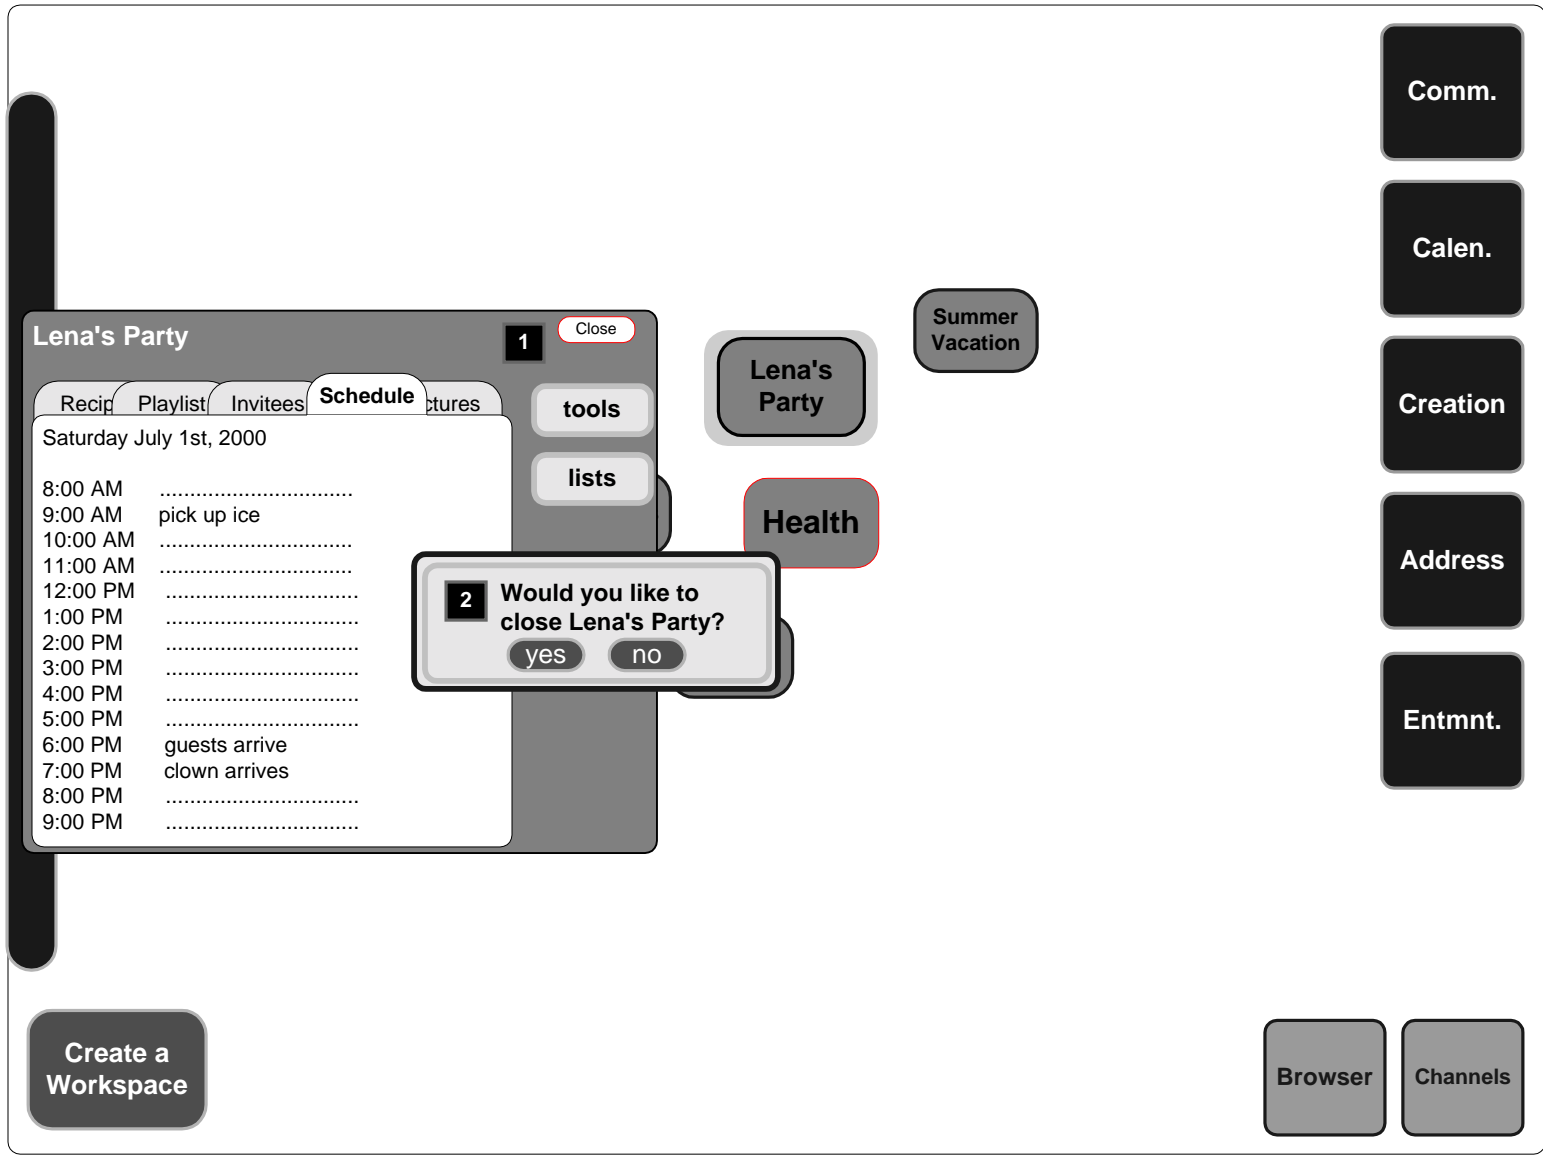

Global elements that are associated with the workspace, such as Tools and Lists are always available to the user from within the workspace.

Invitation-Tabs

The screenshot shows a workspace titled "Lena's Party" with tabs for "Pictures", "Shopping", "Items", "Playlist", and "Schedule". The "Pictures" tab is active, showing a grid of images. One image labeled "Lena" is highlighted with a red box and a "1" callout. Below it is a "description" field. To the right, a "Creation - Invite.gif" tool window is open, showing a red-bordered image area with a red "X" and a "2" callout. Below the tool is another "Lena" image. In the foreground, an "E-Mail" window is open, showing a "to:" field with a list of invitees (all invitees on Lena's Party list, Mike Smith, Julia Snyder, Elliot Michaels) and a "4" callout. The "from:" and "subject:" fields are empty. A "send" button is circled in red. Below the "send" button is a "tools" section with "alerts / timers" and a "5" callout. A dialog box for "alerts / timers" is open, showing checkboxes for "Alert" and "Timer", a "set time interval" dropdown set to "one day", and an "ok" button. On the right side of the workspace, a vertical sidebar contains icons for "Comm.", "Calen.", "Creation", "Address", and "Entmnt.". At the bottom right, there are "Browser" and "Channels" buttons.

- 1 From the "Pictures" tab in his workspace, Todd can drag his picture of Lena onto the "Creation" icon. This will open the Creation Tool with the picture of Lena already opened.
- 2 Once in the Creation Tool, Todd can edit his picture, scribble on it, etc... Todd can then choose to Save the image or he can drag the final picture onto the "Communication" icon so he can send off his invitation as an email. This will automatically save the new version of the image in his workspace as well as trigger the email application.
- 3 The email window opens with Todd's image already in the content. He can still add additional content to the email from this window.
- 4 Mannix recognizes that the image came from the "Lena's Party" workspace and automatically gives Todd the option to email the people on the invitee list associated with the image. He can choose all or some of the people on his list as well as add new people.
- 5 Todd then goes to the "Alerts/Timers" section and has the option to be alerted when he receives replies to his email as well as schedule the email to be sent at a later time. Once Todd hits send, the programs that have been associated with the email (email, creation) close automatically. The workspace folder remains open.

Changing Workspaces-Tabs

The screenshot shows a mobile application interface with a workspace titled "Lena's Party". The workspace has a "Close" button in the top right corner, labeled with a "1". Below the workspace title are tabs for "Recip", "Playlist", "Invitees", "Schedule", and "ictures". The "Schedule" tab is active, showing a list of events for "Saturday July 1st, 2000":

- 8:00 AM
- 9:00 AM pick up ice
- 10:00 AM
- 11:00 AM
- 12:00 PM
- 1:00 PM
- 2:00 PM
- 3:00 PM
- 4:00 PM
- 5:00 PM
- 6:00 PM guests arrive
- 7:00 PM clown arrives
- 8:00 PM
- 9:00 PM

Below the workspace are buttons for "tools" and "lists". To the right of the workspace are two folder icons: "Lena's Party" and "Health". A confirmation dialog box is overlaid on the workspace, labeled with a "2", asking "Would you like to close Lena's Party?" with "yes" and "no" buttons.

At the bottom left is a "Create a Workspace" button. At the bottom right are "Browser" and "Channels" buttons. On the right side of the screen is a vertical stack of buttons: "Comm.", "Calen.", "Creation", "Address", and "Entmnt.".

1

From the workspace, Todd can close the workspace by touching "Close" within the window. Todd then returns to his desktop view.

2

Todd can also touch directly on his "Health" folder and Mannix then automatically prompts Todd with a pop-up window asking whether or not he wants close his workspace for Leah's Party. If he chooses "No", the two workspaces will be open at the same time.
